Quick Guide

- Worked on features like Google and Apple login integrations, OTT platform back-end enhancements, RevenueCat and Razorpay subscription webhook handling.
- Tech stack used: Next.js, React.js, Express.js, MongoDB, Tailwind CSS, and PM2 for deployment.
- Implemented real-time webhook subscription updates, analytics integrations, and optimized server performance.

Education

University College of Engineering, Ramanathapuram, BE in Computer Science and Engineering Aug 2020 – May 2024

Code99 Academy, MERN Stack Developer Certification Aug 2024 – Jan 2025

- Completed full-stack development training using MongoDB, Express.js, React, and Node.js.

Experience

Full Stack Developer, Shortfundly – Onsite Mar 2025 – Present

- Built a role-based authentication system using **NextAuth** with **Google Sign-In**, allowing users to switch dynamically between Event Host and Filmmaker dashboards
- Developed RESTful APIs with **Express.js** and **MongoDB** for creating, updating, deleting, and retrieving festival and user data

Projects

Shortfundly Premium Subscription System [LINK](#)

- Implemented complete premium subscription flow using RevenueCat and Razorpay.
- Integrated RevenueCat webhooks in Express.js backend to handle payment status, renewals, and cancellations.
- **Languages:** TypeScript, JavaScript, Next.js, Express.js
Tools: RevenueCat, Razorpay, MongoDB

Shortfundly Hub – Digital Distribution & Content Management [LINK](#)

- Built a scalable web platform for filmmakers to upload, organize, and manage digital media and distribution workflows.
- Developed authentication, dashboard modules, media management, and secure API integrations with a responsive user interface.
- Optimized application performance and strengthened security using CSP, JWT authentication, and production-ready best practices.
- **Languages:** TypeScript, JavaScript
Frameworks: Next.js, React, Express.js, Node.js
Database: MongoDB
Tools: Tailwind CSS, Git, NextAuth, JWT, REST APIs

Festival organization [LINK](#)

- Built for filmmakers to submit projects and organizers to manage film festivals online.
- Implemented features for event creation, submission tracking, jury review, and deadline/fee management to streamline the festival workflow.
- **Languages:** TypeScript, JavaScript
Frameworks: Next.js, Express.js
Database: MongoDB
Tools: Tailwind CSS, Multer (file uploads), Razorpay (payments)
